Current World Wide Web browsers, e.g., Mosaic and Netscape, support users primarily in the task of browsing the Internet. In some situations, users want to explore topics for which relevant information may reside both on a large local database and on the Web. The MultiSurf project seeks to deal with these situations by integrating text browsing of a local database with hypertext browsing of the Web. In the current implementation, local queries are passed to Web index server(s) for simultaneous s ...

MICROARRAS is an advanced full-text retrieval and analysis system. It supports fast, efficient browsing of a document's vocabulary as well as its text, recursive analytic categories, Boolean search with flexible context specifications, evaluation of arithmetic expressions, and graphical display of various numeric distributions. The system is designed to work with large textbases stored on remote mainframes or on a local store for a micro-computer or workstation. The description covers syste ...

3 [Data management for earth system science](#)

James Frew, Jeff Dozier

March 1997 **ACM SIGMOD Record**, Volume 26 Issue 1

Publisher: ACM Press

Full text available: pdf(25.36 KB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Earth system science is a relatively recent scientific discipline that seeks a global-scale understanding of the components, interactions, and evolution of the entire Earth system.

The data being collected in support of Earth system science are rapidly approaching petabytes per year. The intrinsic problems of archiving, searching, and distributing such a huge dataset are compounded by both the heterogeneity of the data, and the heterogeneous nature of Earth system science inquiry, which synthesi ...

4 UC Berkeley's NSF/ARPA/NASA digital libraries project

The UC Berkeley Electronic Environmental Library Project is a multi-disciplinary project funded under the NSF/NASA/ARPA Digital Libraries Initiative. The goal is to develop a massive, distributed, electronic, work-centered library of environmental information containing text, images, maps, sound, full-motion videos, numeric datasets, and hypertextual multimedia composite documents to support actual environmental planning decisions. By work-centered, we mean a digital library designed to support t ...
